**BIG SHIPMENT** FROM STAR CON.

Ninety Tons of Gold Ore Will Net Over \$7,000.

GRAND CENTRAL DIVIDENDS

MONTANA SHUT-DOWN AFFECTS UTAH COAL MINES.

Manager Milan Packard of the Star arranging for the sale of approximately ninety tons of ore from that property, which should bring on the market today

which should bring on the market today more than \$7,000 net. One car of thirty tons will be sold on controls showing over seven ounces gold and controls showing over seven ounces gold and three and one-half ounces silver per ton, while the sixty-ton lot runs 2.88 ounces gold and three and one-half ounces silver.

The single car lot is the one that has been accumulating for some time—that is, a portion of it has—and rather than keep holding it back, the car was made up from rock of the ordinary grade. It is pretty good stuff, however, and the figures describing it will sound well to the shareholders who have always pinned their faith to the proposition.

While Manager Fackard invariably exhibits a refluctance when it comes to discussing the company's financial affairs and while nothing was wormed out of him yesterday on the subject, it comes from what is considered first-class authority that, were he disposed to do so, he could wipe out the last cent's indebtness against the company, including the voluntary assessment which has been standing against it for more than two years and still have money left, after making his settlements today.

In other words, during the last sixty or ninety days the Star Consolidated has provided the means to do a large amount of exploratory and dead work, in addition to mining ore, and put by enough to pay an indebtadness said to approximate \$60,000. the shareholders who have always pinned their faith to the proposition.

While Manager Fackard invariably exhibits a reductance when it comes to discussing the company's financial affairs and while nothing was wormed out of him yesterday on the subject, it comes from what is considered first-class authority that, were he disposed to do so, he could wipe out the last cent's indebtness against the company, including the voluntary assessment which has been standing against it for more than two years and still have money left, after making his settlements today.

In other words, during the last sixty or ninety days the Star Consolidated has provided the means to do a large amount of exploratory and dead work, in addition to mining ore, and put by enough to pay an indebtedness said to approximate \$60,000.

GRAND CENTRAL CONDITIONS.

Every Assurance That Dividends Will Be Resumed in November.

While the announcement does not come

Will Be Resumed in November.

While the announcement does not come officially, it can be stated without fear of contradiction that the Grand Central company will enter the dividend-paying list again in November. It is also pretty certain that, instead of paying on the 20th of the month as was the practice previous to the last distribution, in August, the company will get back to first principles by posting its dividends on the 6th and paying on the 18th of each month.

For the months of August, September and October, it is said, the company has considerably more than earned its usual distribution of \$25,000, or 10c a share; that it will start out again with a mighty healthy treasury, in addition to a sinking fund calculated to be more than ample to continue the fight against the Mammoth company. The mine is also reported to be in excellent physical condition, the quantity and grade of the ores blocked out being sufficient to warrant the assertion that several years' dividends are now in sight. The advanced price of silver has helped out to an extent greater than the uninitlated might suppose, and by those who have a right to claim a knowledge of what the company is in tip-top shape to make a fine record from now on.

AFFECTS UTAH COAL MINES.

died, the mine is a good one.

MINING STOCK EXCHANGE.

Market Was Inactive and Prices About 5teady.

Business was light on the mining extended, the money value of transactions being represented in the sale of 22.5 shares of the money value of stilo.50 to \$10.60 per share. During the two regular and open board calls a total of 22.034 shares of stock, with a selling value of \$11.502.50, changed hands, the market, generally speaking, showing little change from Wednesday's quotations. Butter Liberal, Star Consolidated and Tetro were each a little firmer, while Con. Mercur, Carisa and May Day were, if anything, weaker than usual.

While the announcement deep to start the money value of \$11.502.50, changed of \$2.000.00 to \$10.000 to \$10.000 to \$10.000 to \$10.000 to \$10.000 to \$1

AFFECTS UTAH COAL MINES. Shut-Down in Montana Trims Down

Production of Coke and Coal.

Copecial to The Herald.)

(Special to The He

from the four camps.

Anticipating a strike of the coal miners of district No. 15, which embraces Utah, Wyoming, Colorado and New Mexico, the Rio Grande Western railroad has ordered enough coal delivered at various points along the line to supply its needs for seven months to come. Whether there is to be a strike or not depends upon the labor leaders in control of the district. Few of the miners of Carbon county, nowever, belong to the union, but if there is no market for coal and coke there would as a result, be less work for the miner and the men in the train service of the railroads.

TEST ON SNAKE RIVER SAND. Operators and Experts Witness Run of Michaelsen Separator.

An interested crowd of mining operators and experts gathered at the rear of one of the Second South business houses yesterday afternoon to witness a test run on Snake river and in the Michaelsen gold separating machine. Mr. Michaelsen conducted the test and P. J. Donohue, the well known mining engineer and mill expert, took samples of the sand as it was fed to the machine, as well as samples of the tailings as they came from the bottom. Both will be assayed today, after which the percentage of saving can be pretty accurately determined.

sayed today, after which the percentage of saving can be pretty accurately determined.

In the sand which was gathered as the product of the run, a fine string of colors fringed the rim of the black sand after being panned down, a process which Mr. Michaelsen uses in making test runs with his small separator in lieu of run eaviliary machine, designed for the purpose which goes with his machines of commercial capacity.

The sand from which the test was made came, Mr. Michaelsen sa'i, from a point above the American Falls, on the Suake river, an employe of the Oregon Short Line having secured several hundred pounds of it for him. The sand was very a fundred pounds of it for him. The sand was very critically examined by a number of the scale are for the protectors, including A. H. Tarbet, who declared if there was any sand like it of the Snake river, in the vicinity of American Falls, at least, he had been unside to find it.

"This sand," said Mr. Tarbet, "is sharp and gritty. I have been doing a lot of building up there and in consequence have been looking for just this kind of material. It would have made splendid mortar, but all that I could find was altogether too fine and free from grit and sharp particles to have been any use to us. As a result we had to ship it in."

Mr. Tarbet explained that he had no wish to question the vernacity of Mr. Michaelsen, but he inclined to the belief that he had been misinformed as to the place where the sand had been secured. The sand put through the machine driver, or has Mr. Michaelsen been a declared gold values and there is no question, either, but that ithe machine driver, or has Mr. Michaelsen been accurated where the sand had been secured. The sand put through the machine driver, or has Mr. Michaelsen been a declared gold values and there is no question, either, but that ithe machine driver, or has Mr. Michaelsen been accurated where the sand had been secured. The sand put through the machine driver, or has Mr. Michaelsen been a declared gold values and there is no que

DALY-JUDGE'S RICH ORE.

Limits of Recent Strike Not Yet

Known-The Kind of Ore It Is. According to Colonel Theodore Bruback, who spent Wednesday in sizing up conditions at the Daly-Judge, the new strike s proving up at a rate that is meeting he expectations of the most optimistic, hother small cave was broken into Wednesday and the body of rich coppergad-gold ore less now been driven. Cal. & H. 460.00 Centennial 18.75 Cop. Range 47.50 Cop. Range

was made for the purpose of learning just what the ore contained, and the returns were as follows: Gold, 0.520 ounces; silver, 233,1 ounces; lead (wet assay), 22.8 per cent; copper, 22.9 per cent; insolubles, 4.5 per cent; cinc, 4.5 per cent; subpar, 15.8 per cent; iron, 2.5 per cent; arsenic, 3.3 per cent, That kind of ore will net the company considerably in excess of \$7,000 a carload of thirty tons. Corper NEAR BEAR LAKE.

Old Salt Laker Has What He Believes to Be a Mine.

Jerry M. Richardson, the old-time prosportion of the past iscovery who has been spending the sector.

lieves to Be a Mine.

Jerry M. Richardson, the old-time prospector, who has been spending the greater portion of the past two years in searching for mineral and working upon a discovery which he made in the mountain range between the west shore of Bear lake and Logan, is in town with some very good looking samples of copper ore which he reports came from the bottom of an eighty-six-foot shaft which, with the assistance of an associate, he has sunk in a six-foot ledge. On the surface, Mr. Richardson says, the ore averaged 12 per cent copper, and the improvement has been such that he is confident that at the present depth the values are much sgreater.

He believes that when the ledge is properly opened he will have a good shipping proposition, notwithstanding the thirty-mile haul down to Montpeller, the nearest shipping point. He has secured a group of three claims, together with water rights, while the ground is well timbered. He hopes to get the necessary financial aid while here to insure the systematic opening of the ground.
